# Full-stack Engineer

A full-stack engineer graduate is available for an immediate start. Project experience gained in collaboration with professional developers and within teams. I am an effective collaborator, a problem solver, and a quick learner. Deeply committed to writing clean, efficient, and maintainable code. I am an enthusiastic programmer with experience working as a shift manager in other areas, like retail, where I lead teams.

SKILLS

Javascript | React | Node.js | PostgreSQL | HTML | CSS | Bootstrap

Wordpress | UI/UX Design | TDD | Github | Agile development | Docker

Adobe illustrator | JQuery | Tailwind CSS

EXPERIENCE

04/2023 – present	**Full-stack Developer**	London, United Kingdom

- Completed the final project with a team of three developers and created the trainee milestone tracker's fully responsive website for the CYF.
- Acquired expertise in using a GitHub project board to facilitate team collaboration within the Agile sprint framework for software development.
- Contributed 85% to the back-end and 20% to the front-end parts of the entire project.
- Collaboration tools used - Slack, Google workspace.
- Tech stack - React, Node.js, PostgreSQL, CSS and advanced React and Node.js libraries.

Volunteer
- Helping students in class with technical skills in Javascript, React, HTML, and CSS.

03/2022 – 11/2022	**Website assistant**	London, United Kingdom

- The job involved modify website using Wordpress and updating listings on other platforms.
- Gained experience working with Microsoft 365 and Google Workspace in a real-world environment.

2012 – 2021	**Career break**	

05/2003 – 01/2010	**Shift manager**	London, United Kingdom

- I was a sole shift manager.
- Lead a team of 6-8 people in a fast-paced business.
- Completed all shift opening and closing-related tasks.

PROJECTS

Tv shows ⧉
- Developed a fully responsive app using JavaScript asynchronous programming techniques, optimised load times by 40%, and improved the overall user experience, leading to a 15% increase in user satisfaction.
- The app shows information on over 300 classic TV series. The site allows the user to navigate to each show by clicking, detailing all episodes for a particular programme.
- Tech stack - Javascript, HTML, CSS, Bootstrap.

Video library ⬀
- Built this full-stack app and scholared to create and deploy databases in Heroku, then in Render.com, created many REST API's, and gained experience deploying the backend server on multiple platforms.
- Tech stack - REST API, React, Node.js (express.js), PostgreSQL, CSS.

Portfolio ⬀
- My portfolio emphasised my work, skills, dedication to continuous improvement, and eagerness to learn and adapt.
- Tech stack - React, Sass, CSS, React libraries.
