Available to start immediately. Full-stack engineer graduate. Completed projects mainly in collaboration with developers from the tech industry and with teams, which proves that I am a problem solver, effective collaborator and quick learner. I am deeply committed to writing clean, efficient, and maintainable code. I am an enthusiastic programmer with experience working as a shift manager in other areas, like retail, where I lead teams.

EXPERIENCE

06/2023 – present **Code your future** — London
Volunteer
- I have been helping students in class with technical skills in Javascript, React, HTML, and CSS.

04/2023 – 05/2023 **Code your future** — London, United Kingdom
Full-stack Developer
- Completed the final project with a team of three developers and created the trainee milestone tracker's fully responsive website for the CYF.
- Gained experience in how to work on a Github project board for team collaboration in agile software development.
- Contributed 85% to the back-end and 20% to the front-end parts of the entire project.
- Tech stack - React, Node.js, PostgreSQL, CSS and advanced react and Node.js libraries.

03/2022 – 11/2022 **Maroghi group** — London, United Kingdom
Website assistant
- The job involved modify website using Wordpress and updating listings on other platforms.
- Gained experience working with office tools and co-working tools in a real-world environment.

2012 **Career break**

05/2003 – 08/2009 **KFC** — London, United Kingdom
Shift manager
- I was a sole shift manager.
- Lead a team of 6-8 people in a fast-paced business.
- Completed all shift opening and closing-related tasks.

PROJECTS

Video library ⎋
- Built this full-stack app and scholared to create and deploy databases in Heroku, then in Render.com, created many REST API's, and gained experience deploying the backend server on multiple platforms.
- Tech stack - REST API, React, Node.js (express.js), PostgreSQL, CSS.

Tv shows ⎋
- Developed a fully responsive app using JavaScript asynchronous programming techniques, optimised load times by 40%, and improved the overall user experience, leading to a 15% increase in user satisfaction.
- The app shows information on over 300 classic TV series. The site allows the user to navigate to each show by clicking, detailing all episodes for a particular programme.
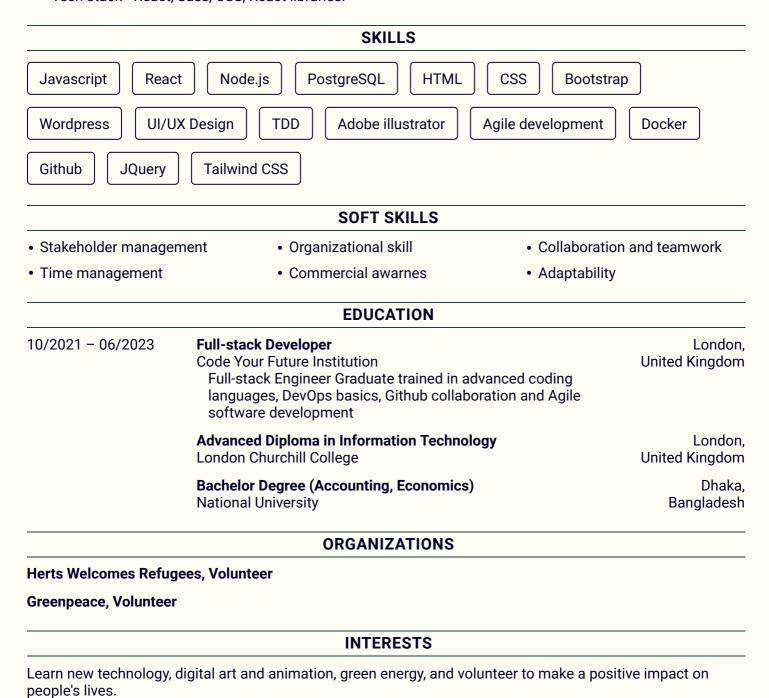

- Tech stack - Javascript, HTML, CSS, Bootstrap.

Countries app ⎋
- Made this app with a dark and light theme to improve user efficiency by 81.9%. The app lets a user to search for a country and display key information that improved the overall performance by 30%. The website let users to set countries by continent or use search bar to navigate.
- Tech stack - React, Router, Javascript, Bootstrap, CSS.

Portfolio ⎋
- My portfolio emphasised my work, skills, dedication to continuous improvement, and eagerness to learn and adapt.
- Tech stack - React, Sass, CSS, React libraries.

SKILLS

Javascript React Node.js PostgreSQL HTML CSS Bootstrap
