A devoted full-stack engineer graduate is available for an immediate start. Project experience gained in collaboration with professional developers and within teams. I am an effective collaborator, a problem solver, and a quick learner. I am deeply committed to writing clean, efficient, and maintainable code and eager to join a forward-thinking team where I can apply my technical skills and passion for software development to create dynamic solutions to make a positive impact on people's lives.

KEY SKILLS

- Responsive web design
- Google workspace
- CI/CD
- Git/Github
- HTML
- Adobe Creative Suite

- REST API development
- Javascript
- ReactJS
- Node.js
- PostgreSQL
- Tailwind CSS
- AI code improvement

- Bootstrap
- Docker
- Cloud computing
- Agile software development
- Responsive design
- Windows, Linux OS
- Tech Documentation

EXPERIENCE

Videos recommendation   June 2024 - present
Full-stack Engineer   London, United Kingdom

- I have been using the AWS platform exclusively to construct this completely functional website for a youtube video's library.
- Popular cloud computing functionalities are underutilized, such as EC2, S3, RDS, etc.
- Tech stack: React, Router, Context, Javascript, CSS, MUI, Docker.
- **Link** - In progress.

Game Play   Dec 2023 - Feb 2024
Frontend Engineer   London, United Kingdom

- I built this fully responsive website using React Hooks techniques, which resulted in 40% faster load times and an overall better user experience.
- Let users play more than 300 fantastic games for free. The website is built using HTML best practices and meets W3C standards, and is user friendly.
- Basics of website design, including color, layout, and typography, are adhered to.
- Tech stack: React, React hooks, Javascript, CSS, Chakra, Bootstrap, Visual studio.

Portfolio   Sept 2023 - Nov 2023
Frontend Engineer   London, United Kingdom

- Successfully developed and refactored code in templates to generate a fully responsive website, demonstrating my ability to enhance and optimize existing code for improved performance and user experience.
- Tech stack: React, Javascript, TailwindCSS, and advanced libraries.

Code Your Future   April 2023 - May 2023

Software Developer Internship   London, United Kingdom

- Collaborated with a team of three developers on the Hackathon final project to create a fully responsive website for the CYF students' trainee milestone tracker.
- Acquired expertise in using a GitHub project board to facilitate team collaboration within the Agile sprint framework for software development.
- Contributed 85% to the back-end and 20% to the front-end parts of the entire hackathon project.
- The website is 100% accessible, meets W3C standards.
- Collaboration tools used: Slack, Google Workspace, and Github.
- Tech stack: Javascript, React, Node.js, PostgreSQL, and CSS.

Maroghi LTD   March 2022 - October 2022

IT Support assistant   London, United Kingdom

- Gained experience on content management platforms such as Wordpress.
- Supported the deployment and maintenance of online products.
- OS installation, user assignment and upgrading laptop.

SOFT SKILLS

- Organizational skills
- Adaptability

- Collaborative teamwork
- Punctuality

- Time management
- Accountability
