📁 PROJECTS

Trainee Milestone Tracker (Hackathon) ⧉
- Completed the final project with a team of three developers and created the trainee tracker's fully responsive website for CYF. I have learned advanced backend development with asynchronous programming techniques and how to work on a Github project board for team collaboration.
- Contributed 80% to the backend and 20% to the frontend of the entire project.
- The website scored 100% accessibility and over 90% on best practices and performance in Lightbox analysis to retain product owner contentment.
- Tech stack - React, Node.js, REST API, PostgreSQL, CSS and advanced react and Node.js libraries.

Tv shows ⧉
- Developed a fully responsive app using JavaScript asynchronous programming techniques; optimised load times by 40%; and improved the overall user experience, leading to a 15% increase in user satisfaction ratings..
- Tech stack - Javascript, HTML, CSS, Bootstrap.

Countries App
- Made this app with a dark and light theme to improve user efficiency by 81.9%. The app lets a user to search for a country and display key information that improved the overall performance by 30%. The website let users to set countries by continent or use search bar to navigate.
- Tech stack - React, Router, Javascript, Bootstrap, CSS.

Hotel Booking App ⧉
- Implemented date calculation feature using React Moment library to accurately count booking dates, resulting in a 30% reduction in booking errors and improved user satisfaction,
- Added restaurant order option to satisfy 80% of the product owner's demand. A booking form is available for new bookings. The website shows the guests list and the option to show the guest's profile.
- Tech stack - React, Bootstrap, CSS, Moment.js.

Video Recommendation ⧉
- Built this Fullstack App and scholared to create and deploy database in Heroku then in Render.com, REST API and essential backend and frontend techniques, .
- Tech stack - REST API, React, Node.js (express.js), PostgreSQL, CSS.

Baby Name picker ⧉
- A fully responsive site empowers a user to pick up favourite names or remove the names. The search bar filters names by letters or gender, Recalled react hooks, advanced CSS and Javasript techniques.
- The app scored 90% accessibility and 100% best practice in the Lighthouse test to expand user experience.
- Tech stack - React, Javascript, Bootstrap, CSS.

Crypto Daily Tracker ⧉
- Generated this highly informative crypto website allows users to check top 100 crypto currency real-time prices and all past records of a particular currency.
- Tech stack - Tailwind CSS, React, Node.js, React spring.

🧠 SKILLS

| Javascript | React | Node.js | PostgreSQL | HTML | CSS | Bootstrap | Wordpress |

| UI/UX Design | TDD | Adobe illustrator | Agile development | Docker | Github | JQuery |

| Tailwind CSS |

💬 SOFT SKILLS

- Stakeholder management
- Time management
- Organizational skill
- Commercial awarnes
- Collaboration and teamwork
- Adaptability

💼 PROFESSIONAL EXPERIENCE

03/2022 – 11/2022

Maroghi Group
Website assistant
- The job involved modify website using Wordpress and updating listings on other platforms..
- Gained experience working with office tools and co-working tools in a real-world environment.

London,
United Kingdom

05/2003 – 08/2009

KFC
Shift manager
- Sole shift manager.
- Lead a team of 6-8 people in a fast-paced business.
- Completed all shift opening and closing-related tasks.

London,
United Kingdom

🎓 EDUCATION

10/2021 – 06/2023

Full-stack Developer
Code Your Future Institution
  Full-stack Engineer Graduate trained in advanced coding languages, DevOps basics, Github and Agile software development

London,
United Kingdom

Advanced Diploma in Information Technology
London Churchill College

London,
United Kingdom

Bachelor Degree (Accounting, Economics)
National University

Dhaka, Bangladesh
